The remedy for these conditions does not lie in cosmetics. Skin disease is caused by impurities in the blood, and by nervous disorders due to weakness and disease of the distinctly feminine organism. Doctor Pierce's Golden Medical Discovery is the greatest of all known blood-purifiers. It not only drives all impurities from the life stream, but fills it with the rich, life-giving elements of the food. Dr. Pierce's Favor-ite Prescription acts directly on the delicate and important organs that bear the burdens of wischood and motherhood. It makes them pure, strong, well and vigorous. A course of these two great medicines will transform a weak, sickly, nervous, despond-ent woman, who suffers from unsightly eruptions of the skin, into a healthy, happy, amiable companion, with a skin that is clear and wholesome. These medicines are made from herbs and roots, and contain no minerals of any description. They simply assist the natural processes of assimilation, secretion and excretion. Medicine dealers sell them.

It is a druggist's business to give you, no to tell you, what you want.

"About four years ago," writes Thomas Har-ris, of Wakefield Station, Sussex Co., Va., "my daughter Heien was afflicted with eczema in a distressing form. Dr. Pierce's medicines cured her after all other remedies had failed."

Dangerous Talk.

The recent conference held in this city by representatives of various labor organizations for seeing what could be done in aid of the striking miners, was characterized by an amount and quality of oratory which, in any other country than this, would be regarded as a dangerous symptom. In the speeches delivered by one of the most prominent labor agitators of the present, there was a violence of expression that indicated extreme butterness and hostility, not only to the wealth of the the directors of the association. country, but also to the organized authorities. In short, if the expressions used signify anything, they mean an advocacy of anarchy, pure and simple. It is true that there is much cause for discontent among working people, operatives in stores, factories and work shops, who find themselves compelled to toil many hours a day, while trusts and monopolies win millions on the stock exchanges and accumulate enormous sums every year by keeping the wages of their employes at the lowest possible point. It is true that farmers after a year of arduous labor find themselves compelled to part with their grain at a figure hardly more than half what is subsequently realized upon it by the speculators in the grain markets.

But with all the privation and suf-

fering of the past few years, the people have not lost their respect for organized government nor are they prepared to accept anarchistic doctrines at the hands of professional agitators. Anar. chy is a strictly foreign product. The professional anarchists of this country are almest to a man, foreigners, the secret of whose hatred of government lies in the fact that they wish to obtain something for nothing. Anarchy is the product of a country where despotic rule has prevailed for centuries. It has no place in the United States and very little, if any, sympathy is felt for it by our people. The labor leaders. even those who participated in the conference in this city, took pains to file their protests in the papers against the revolutionary utterance that were indulged in. One said: "Such remarks are ill-timed and in poor taste;" another: "Such teachings are nothing more or less than anarchy." These utterances fairly represent the state of feeling among the better class of labor leaders. Our govenment is not what it ought to be, but even a bad government is preferable to no government at all. Revolutionary and incendiary speeches are dangerous in time when many men are out of employment, and therefore, discontented. When money is plenty anarchist orators are harmless. -St. Louis Christian Advocate.

Gov. Stephens' Latest Financial Tri-

Gov. Stephens made an announcement yesterday which will bring a feeling of relief to Missouri tax-payers. He said that he was able to promise emphatically a prompt payment of every warrant, and without calling a special session of the legislature. For several years, since the operation of the constitution reduced the rate of taxation for the state purposes, some No woman should be satisfied to difficulty has attended the task of making revenue and expenditure meet. The regular session of the legislature last winter refused to agree on measures which seemed absolutely necessary to protect the credit of the state. The administration was thus left to confront an apparently certain deficit. But the governor and other executive officers addressed themselves vigorously to the business of organizing the details of income and expense. The governor's long experience and extensive influence in financial circles were especially valuable at this juncture. His administration has achieved a triumph which four months ago seemed impossible. It has neither pleaded a deficit nor asked for a special session and the credit of Missouri is sustained. -St. Louis Repudlic.
